- CCENT,
- CCNA (R & S)
- CCNA (Security)
- CCNP (R & S)

Linux:

- System Administrator
- System Engineer

LEARNING

STUDENT • LAUNCHCODE.ORG • 2017 JAN – JUNE

LC101 opened my eyes to the world of computer programming like nothing I have ever experienced. I went from learning basic syntax in Python all the way to back-end web development using C# with Visual Studio, ASP.Net Core MVC, and SQL. Quite possibly the best learning experience of my life.

STUDENT • ST. CHARLES COMMUNITY COLLEGE • 2014 – PRESENT

As a Cisco Networking Academy Partner, SCCC was my first foray into classroom instruction in computer technologies. From barely knowing how my wi-fi router worked at home, I went on to become a competent Networking Associate and Professional in Routing and Switching, and have a tremendous grasp on what it takes to keep networks secure.

SELF-STUDY • EDX.ORG • 2012 AUG – PRESENT

I heard about Edx on NPR, and I fell in love with the entirety of what Edx was and has become. From there Mission Statement: "Increase access to high-quality education for everyone, everywhere." I have finished classes from MIT, Harvard, the Linux Foundation, Microsoft, W3C, and more.

OBJECTIVE

I am actively searching for a position with Launch Code as a Teaching Fellow, and if the need were to arise, a Teacher as well.

OTHER INTERESTS

I am active with a Kickball and Volleyball league, currently. I usually play Softball, Billiards, and Darts in various other leagues throughout the year, and I try to get other people involved as well.

I am an active community organizer, having started to different meetups online.

I am engaged daily in politics, science and the continuing separation of church and state.

WORK

OWNER • J L YOUNG CONSTRUCTION • 2015 MAY - PRESENT

Deck construction, pressure washing and staining. I do everything myself: marketing and ad placements, answering the phones and setting appointments, measuring and estimates, ordering supplies from vendors, building/cleaning decks and patios, to collecting payments from customers; plus, all the front end stuff, fictitious name registration and filing Articles of Incorporation, business licenses, bonds and business insurance.

ASST. MANAGER/BARTENDER • R.T. WEILER'S • 2014 MAR – PRES.

I have been working with the owner, Marc Rousseau, for 10 years or more. After I returned from travelling for a year and half, he offered me a position to help him build his business. I only bartend now, but we are in constant contact, still trying to build his restaurant to be the best it can be.

VARIOUS POSITIONS • TRAVELING • 2012 AUG – 2014 MAR

While travelling with my former fiancé's career as an Occupational Therapist, I worked in multiple positions as we relocated to different cities and/or states every 3 months or so: Assembler for Assembler's Inc at Academy Sporting Goods in Port Arthur and Beaumont, TX; Painter for Circle K/Shell in Lake Placid and Sebring, FL; Plumber's Helper for Ethical Plumbing in Greenville, SC; Tower and Civil Crew for Dynamic Innovations in Dallas, TX. The last one was my brother's company, he builds and maintains cell towers, and that was a terrific experience!

OWNER • LITTLE JIMMY NEXT DOOR • 2008 MAY – 2012 AUG

My first small business. I was a self-employed handyman, doing various tasks in my spare time. Basically, everything dealing with residential services. Cleaning gutters, mowing, installing ceiling fans, and a hundred other things.

MANAGER • BIG A'S ON THE RIVERFRONT • 2001 NOV – 2012 AUG.

I worked my way up the food chain from being a bouncer in college, to being the Manager when I left 11 years later. From 2007 until I left in 2012, I was the Bar/FOH manager. Between the Kitchen manager and myself, we were responsible for the operation of a multi-million dollar restaurant.
